## **ESO Archive Frequently Asked Questions**

Instrument Description and Documentation

• How do I find out what are the characteristics of the filters ESO uses?

Please refer to the **Exposure Time Calculator service**.

Otherwise, please check the individual user manuals for <u>Paranal</u> and <u>La Silla</u> instruments.

How do I get the photometric quality of a given night?

The information about photometric zeropoints is available at the <u>DFO Quality Control</u> pages.

Please select on the **Trending & QC1** pull down menu the instrument you are interested in.
