Archive Video Tutorials

We have published an initial set of video tutorials to illustrate the services of the ESO Science Archive Facility, with particular emphasis to the Archive home page and to the Archive Science Portal.

The videos are available via the European Southern Observatory @ESOSupport youtube tutorials channel.

The channel is meant for scientists that want to work with ESO telescopes and services - from proposal planning (Phase 1, see Users Workshop videos), to preparing observations (see Phase 2 tutorials), to accessing the ESO Science Archive (see ESO Archive Services tutorials), and reducing data (see Reflex pipeline and molecfit tutorials).

You can jump directly to the list of Archive video tutorials following this youtube link: ESO Archive video tutorials
